3		Review NWEA Growth Data	Share school-wide progress with SSC members.	Gloria presented the NWEA data from the fall and winter 2024-2025. The data shows that students continue to grow in both math and ELA. Students needing additional support also show academic growth (sometimes slower). She explained the data and described the process for monitoring student progress and how teachers work with individual students in the classroom to encourage growth.

	4 pm	Closing Comments	Feedback/Questions	Does the school also track students at grade level but with little or no growth? Ms. Marchant answered the question: Yes, that is why we work with teachers to look at students who are at grade level but might not be making growth. We must monitor these students' progress to avoid having students regress and who could no longer be at grade level.
